## Special Train From Oklahoma

Oklahoma City, Okla., Sept.—The Oklahoma delegation and exhibit for the International Dry-Farming Congress at Lethbridge, Alta., will leave this city Sept. 28th over the "Katy" road on a special train which will be one of the most palatial equipments ever sent out of the Southwest. The train has been routed via Kansas City over the Katy, to Denver over the Santa Fe, to Billings, Mon., over the Burlington, to Seattle, Wash., over the Great Northern and connections, and thence to Lethbridge over the Soo and Canadian Pacific. Returning, the route will be east to Winnipeg, thence south to St. Paul and down the Mississippi Valley through St. Louis, making many stops.

Secretary Marle Woodson of the committee in charge of the arrangements is preparing the best exhibit possible, and is setting out of the state, and is arranging to have two carloads of dry-farmed products sent along with the delegates and shown at all important stops. The exhibits will be gathered in every county of the state and will comprise grains, grasses, roots and fruit.

Last year Oklahoma captured the first prize for wheat at the Dry-Farming Congress at Colorado Springs, and came near the top on kafir and mil maize. Instances of bumper crops are frequent this year, and the committee has hopes of capturing first prize on several products at the big exposition at Lethbridge next October.

## ADDITIONAL NEWS ITEMS.

Mrs. Blanch O'Brien of Moscow, Idaho, is visiting in town.

Born.—On Thursday October 8th, to the wife of Roy O'Brien a son.

On Friday, 11th, to the wife of J. W. Evans, a son.

Mr. Richard Skousen left Tuesday morning for Salt Lake City, Utah.

Messrs. B. S. Young and Geo. W. Green, of Lethbridge, were visitors in town on Tuesday.

Miss Roxie Rodeback, who has been visiting her sister Mrs. Fred Burton, at Cardston, returned home on Monday morning's train.

During the past week the Knight Sugar company shipped another consignment of cattle to Calgary. There were about four hundred head in the shipment and it required 22 cars to transport them. The lot bought in an amount in the neighborhood of fifty thousand dollars. This fall the company is shipping a train load every week. They have about two or three more shipments to make before their fall sales are completed.

Mr. John R. Revill was a visitor in town this week canvassing for subscriptions to the Lethbridge Herald. Mr. Revill is the candidate for the contest from the Lethbridge Ward of the Church of Jesus Christ of Latter Day Saints and it is the purpose of the Ward to build a meeting house with the prize money should it be captured by them. If you wish to subscribe to the "Herald" do not fail to turn your subscription the right way as they are working in a good cause.

## COL. ROOSEVELT SHOT BY SCHRANK

Chicago Ill., Oct. 15th.—Col. Theodore Roosevelt with a bullet buried in his chest wall 4 inches deep fired by John Schrank at Milwaukee, delivered an hour and a half address, walked to and from his auto, and into an ambulance which took him to the Mercy Hospital where his physicians make an X-ray examination. It is stated by his personal physician that unless something unforeseen occurs he will recover.

The following report was given by his physicians: "Col. Roosevelt's hurt is a deep bullet wound of the chest wall without striking a vital organ in transit. The wound was to the right of, and one inch below the level of the right nipple. The range of the bullet was upward and inward, a distance of four inches, deeply in chest wall. There was no evidence of the bullet penetrating the chest wall. Pulse, 90; temperature, 99.2; respiration, 20; lungs, clear; no cough, 32 at 2 a.m. No operation to remove bullet is indicated at the present time. Condition hopeful, but the wound is so important as to demand absolute rest for a number of days.

## House Built of Farm Products

Oklahoma City, Okla.—One of the features of the Oklahoma exhibit at the International Dry-Farmed Products Exposition at Lethbridge, Alberta, will be a log house built entirely of farm products. The sides of the building will be made of large stalks of corn laid parallel to represent logs. The roof will be shingled with complete heads of kafir and mil in alternate rows. The fire place and chimney will be built of various colored ears of corn.

On one side of the house will be a cotton field with negroes at work in it. In front of the house door another old-time southern "darker" will be just opening an immense Oklahoma watermelon. The cotton field is to be composed of actual growing stalks of cotton. These stalks have been grown in the green house of the agricultural school, having been placed in tubs, and they will begin opening buds about the middle of October.

In view of the fact that cotton and kafir are not grown in Canada and that very little corn is grown, the exhibit is certain to attract much attention and be one of the novel features of the exposition.

Mr. Hood of the local Bank of Montreal left on Monday morning for Outlook, Saskatchewan, where he is to be manager of the bank there.

A circular note has been issued by Mr. H. T. Gussow, Dominion Government Botanist, warning potato growers against a disease called the "potato canker", which is causing some alarm throughout the Dominion. A copy of the circular with cuts showing the character of the disease may be had on application to the Department.

Growers are requested to examine their potatoes carefully at harvest time and on discovery of the disease immediately send specimens to the Dominion Botanist, Ottawa.

## Mixed Farming Demonstration Train

The advantages of mixed farming will be well demonstrated to the farmers in the Raymond district on the afternoon of Saturday, November 10, when the "Mixed Farming Special" train, conducted by the Alberta Department of Agriculture, will be in Raymond from 12:30 p. m. until 6:30 p. m. The train consists of nine cars, including two carloads of pure bred cattle and horses and a carload of choice poultry. Another car will be devoted to dairying and soil cultivation and there will be an effective exhibit of weeds, the harmful effect of which will be fully explained.

The purpose of the train is to breed dairy and beef cattle, hogs, sheep and poultry. Particular attention will be given to dairying and hog raising, but all other features will be fully covered. Models of hog sheds and poultry houses will be carried along and explained by men skilled in the business. In short the train will be a model farm school on wheels and is well worth a visit from every farmer who wants to know the "latest styles" in agriculture. Three hours spent in attendance at the train school will pay any farmer many times over. All the lectures will be "meat" from beginning to end, and all features will be treated with reference to Alberta conditions.

The live stock will be taken to Mr. Kelpha's barn if weather is stormy, if not, stock will be shown at the depot, where skilled judges will explain the points of the animals to the farmers and tell how they should be bred, fed and managed in Alberta. The features on field husbandry, dairying, etc., will be delivered in the Second Ward Meeting House, beginning at 2 p. m. and continuing until 5 p. m.

The department will also provide instruction and entertainment for the farmers' wives and likewise ladies of Raymond, who will be addressed by Miss Stevens, a noted speaker and demonstrator in domestic science.

All farmers and their wives are cordially invited to attend the school and to bring their problems. The fullest questioning is invited. It is a farmers' train and the gate is wide open.

## Rules for Irrigationists to Follow

Too much water is an injury to soil.

First.—It washes out plant food. Nitrogen is the plant food element that the western soil is most deficient in. It is easily washed out. If washed below feeding ground of plant roots, it is lost.

Second.—It clogs the surface few inches of soil by cementing the small particles together and thus produces puddling, which all recognize as very injurious to soil.

Third.—It crows out air. This lessens the action of bacteria in making plant food.

Fourth.—It lowers the temperature of soil. This retards growth. Seasons are too short here and growth should be hastened.

Fifth.—The excess water that goes into the soil comes out somewhere. It often seeps out on the land lower and injures it, or even destroys its use for agricultural purposes.

## Canadian Pacific Tree Growing Contest

The best tree growers in Southern Alberta will be awarded prizes to a total amount of \$2,400 for their work in the next two years. These prizes are offered by the department of Natural Resources, Canadian Pacific Railway, with a view of stimulating interest in arboral adornment of prairie farms. While the treeless portions of the plains of Southern Alberta are especially adapted to the economical beginning of agricultural operations, it cannot be gained that, after the start has once been made, the absence of trees tends to make the farmstead less homelike and more liable to uncomfortable conditions on account of lack of shelter. Realizing the desirability of a greater and more extended growth of trees, the Railway Co. has inaugurated the competition mentioned.

Briefly, the conditions of the contest are as follows: Those eligible are actual settlers (owners or lessees) resident on land planted by the Canadian Pacific Railway Company or the Alberta Railway and Irrigation Company, recently acquired by the C. P. R., south of township 28, 2 line east and west through Crossfield is practically the northern limit; plantations set out previous to the spring of 1911 cannot compete; settlers who enter the competition must notify the Forestry Branch, Department of Natural Resources, Canadian Pacific Railway, Calgary; prizes will be awarded in the fall of 1914, after which time further competitions will be instituted, open to all settlers growing windbreaks in the district; there must be at least one hundred entries.

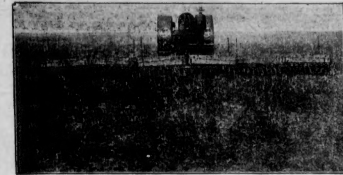

The prizes are as follows: Sweepstakes prize of \$600 for the best plantation; grand prize of \$200 for the best plantation in the C. P. R. Irrigation block; \$100 for the second best plantation in the Irrigation Block; four prizes of \$50 each for western section of Irrigation Block; two prizes of \$50 each for central section; two prizes of \$50 each for eastern section; grand prize of \$300 for the best plantation in A. R. and I. block; \$100 for second best plantation in A. R. and I. block; four further prizes of \$50 each for plantations in A. R. and I. block; eight prizes of \$50 each for plantations on land outside of the Irrigation Block; sweepstakes winner barred from the latter.

The plantations will be judged on the following points: Preparation of soil, 10 points; cultivation and care of trees, 30 points; brush, fruits, shrubs and flowers, 10 points; growth and appearance of trees at time of final judging, 30 points. Judging of the first two points will commence next spring.

In order to encourage entries the Forestry Branch will supply free of charge half the trees needed by the competitors. For the other half entrance will be charged on about trees or over \$1 per hundred. Varieties offered are Russian poplar, cottonwood, green ash, Manitoba maple, larch, larch willow and balsam poplar. In addition to furnishing trees, the Forestry Branch have issued a bulletin entitled, "Increase the Value of Your Farm," which will be sent free of charge to all applicants, whether entered in the competition or not. This bulletin gives full direction for setting out plantations. W. S. Rankin, Calgary, Alta.

## Biggest Potato Grown in 1912

Kalispell, Mont., Oct. 9.—The Kalispell Chamber of Commerce plans to capture the prize for the biggest potato grown in 1912 at the International Dry-Farming Congress at Lethbridge this month, and is already canvassing the potato district surrounding it and soliciting the largest potato to exhibit. The largest potato ever seen by any potato grower in Montana and some of them is from the Aristok county in Maine, and others from Old Ireland—was the pride of the Kalispell Chamber of Commerce last year, having been grown on the Flathead reservation on sod breaking, the first plowing, and it is anticipated that this year a spud of equal dimensions and weight will be taken to Lethbridge in the exhibit that the Flathead country is preparing and that all the world will marvel at the size of it.

Lethbridge, Alta., October, 14.—One of the most valuable premiums to be contested for at the International Dry-Farmed Products Exposition here next week (October 19 to 26) is the Emerson Engine Disc Harrow, for the best individual farmer's exhibit of shear grain.

This prize is donated by the Emerson-Brantingham Company of Rockford, Illinois, and will be delivered free to the winner from the nearest agency of Tuohy, Anderson & Co. It is particularly appropriate that such an implement should be offered at a dry-farming exposition, as the disc harrow is one of the most effective tools in use by the farmers of the dry countries. Being an excellent sub-surface packer, it not only prepares a better seed bed, conserves moisture, the bank account of the dry-farmers. The machine is a new one, and the only engine disc harrow made, although the "Emerson" is famous for its have been making engine implements since the early days of the steam plow. In the past the power farmer has had to be content with pulling the common horse disc harrow behind his engine, but these are rather light for effective work behind a tractor. The total weight of the machine is 1700 pounds, so it will stand all the work given it.

There will be demonstrations of three of these harrows drawn by a Big 4 tractor at the Exposition here all next week.

## APPLY AN OLD SAYING to the marketing of your Grain

### "NEVER PUT OFF TILL TO-MORROW WHAT YOU CAN DO TO-DAY"

With hundreds of conditions the world over affecting prices on the Central markets you cannot sell all your crop at the top price of the season. As you can get cars, ship your grain on consignment and each will average up a fair price. Ship to the Grain Growers' Grain Co. and you will be sure of your grain selling for the top price, and also you will get the promptest and best service in the handling of your business. The Grain Growers' Grain Co. was started and is conducted by Farmers and for Farmers. Its chief aim is "Service to Shippers," as shown by its—

1. Unbeatable Selling Organization—That gets top prices.
2. Sampling Department—That checks the Government grading of cars consigned to it.
3. Claims Department—That when you can supply fair evidence, collects claims for you free of charge.
4. Guarantee to carry out "our instructions"—That it lives up to absolutely.
5. Absolute square dealing in every way—Today can point to the most successful and progressive Company in Canada.

Compare Capital paid up, \$11,975 in 1907, to \$586,372 in 1912.

"Grain handled, 2,340,000 in 1907; to 27,775,000 in 1912.

"Profits (going back to farmers), \$790 in 1907, to \$121,164 in 1912.

This unparalleled progress in every department, beyond question could only be the result of promises fulfilled and satisfaction given.

The 12,000 farmers responsible for this Company now offer the perfected organization for your use and also point out the fact that you can become a part owner of this prosperity any time. How true the old saying is, "Never put off till to-morrow what you can do to-day." Act to-day—Write

We are a day late in publishing this week owing to the fact that the Editor was at Cardston attending the funeral of the late Mrs. Wm. Duce, who passed away on Tuesday evening. Mrs. Duce has been suffering for several years with dropsy and has been "tapped" numerous times, and deaths come to her as a rest from her long sufferings. She leaves a husband, four children, her father and mother, brothers and sisters and a host of friends to mourn her loss.

Mr. A. Butcher who has managed the dry goods department of King Bros. for several months past, left on Monday for Tabor, where he will accept a position with the Boston Clothiers, Mr. Bates, of Idaho, will succeed Mr. Butcher in the management of this department.

Big dance at Opera House to-night.

The train officer is preparing for a campaign soon. Better stay at school boys.

The features by which a Congressman can be judged most accurately are his eyes and his nose.

A new voter's list is to be seen at the town office. You had better find out if you are on the list as the municipal election is near at hand.

France, which was more prompt than America, to recognize the genius of Wilbur Wright, erect a monument to his memory on the historic plain of Avours, where he made his first flights in that country.

How do you go from your home to your work, or from the railroad station to your work? Is it always by the same route? Probably it is, you are growing old—not perhaps in years, but in habits. To do the necessary daily duties always in the same way is not wise. It tends to make monotonous what might be varied. Those who keep longest their zest in life and their mental suppleness are those who have learned the value of the little daily accretions of refreshment.

On Monday night "Ye Editor" was awakened at about 9.30 by what seemed a thousand demons yelling at his window, but upon investigating it was found that the Raymond Military Band were giving him and his bride a "Royal Welcome Home." After trying every way imaginable to get the boys to go home and be good he found it necessary to go up and invite them into the house, after which they rendered several selections and then went peacefully home. Two had you didn't let us know about it sooner, boys, we might have served refreshments. Come again, you're always welcome.

**SOMETIME, SOMEWHERE**

Sometime, somewhere, in the eternal plan,  
Will come a good to offset every ill,  
As Nature's book is balanced, so to man  
A balance perfect come there must and will;  
This, then, our solace, when the way is dark  
And only sorrows are we called to share,  
As came God's sunshine in the storm-tossed Ark,  
'Twill come to us sometime, somewhere.

Sometime, somewhere, in this world or the next,  
And, in some way, a perfect equipose  
Will come to souls by troubles now perplexed,  
And all our griefs find compensating joys  
Go on, leave heart! if doing what you can  
Life's burdens, as they come, to fully bear—  
Fear not the justice that is due a man  
Will all be yours something somewhere.

Mr. Dilworth Woolley is erecting a building on the corner of Third East and Second North.

Mrs. Jas. Walker, who has been working at office of the Knight Sugar Company, resigned her position on Monday night. Mrs. Walker will be missed very much by the Sugar Company staff as she has been a member of the staff for several years.

FOR SALE—160 acres, fenced corners on Marmoth School House; \$18.00 per acre; good terms; 5% interest.

FOR any "exclusive features" that the custom tailor may be able to provide, you are likely to pay heavily—probably more than the clothes themselves are worth.

You should pay only for two things in clothes—serviceability and style.  
Beyond these, no single feature is worth paying very much for. And yet there are points about FIT-RITE clothes that it isn't reasonable to expect in garments made by the small custom tailor.

You Should Know**

Golden Seal, the root of the above plant, is a very useful medicine. Many people gather it in our rich woodlands during the summer. Few people know how valuable it is in dyspepsia, catarrh, and as a general tonic. Many thousands of pounds of this root are used each year in the famous catarrh remedy, Peruna. This fact explains why everybody uses Peruna for catarrh.
